

## Prof. Dr. Jeanine L. Olsen

Marine Benthic Ecology and Evolution Group,  
Centre for Ecological and Evolutionary Studies,

“IT WAS VERY EXCITING IN THOSE DAYS.  
WE WERE EXPLORERS.”

**Marie-Tharp** (1920-2006), Oceanographer, Faculty 1948–83

A pioneer of modern oceanography, Tharp was the first to map details of the ocean floor on a global scale. Her observations became crucial to the eventual acceptance of the theories of plate tectonics and continental drift in the earth sciences.
