

GEOMAR and the respective institutes of Kiel University, one of the leading locations for climate-related isotope analysis and age determination in Germany.

In addition to the professional exchange with his colleagues in Kiel and the planning of new projects, Professor Bard will share his experiences with young scientists in a special lecture series.

Prof. Bard received his master's degree in 1985 in Engineering Geology at the University of Nancy (France) and his doctorate in 1987 at the Université de Paris 11 Orsay. Subsequently, he worked at the Lamont-Doherty Earth Observatory of Columbia University (New York, USA) and the French Commissariat l' Energie Atomique et aux Energies Alternatives (CEA) in Gif-sur-Yvette, France. Since 1991 he conducts research in southern France and, until 2001, was a professor at the University of Aix-Marseille III, a visiting professor at Harvard University (Cambridge, Massachusetts, USA) and the University of Bern (Switzerland). Since 2001, Edouard Bard is the
