Rack of the missing Boknis-Eck observatory found BSH ship DENEK recovered GEOMAR and HZG sensor node

18 February 2020 / Kiel. Two racks equipped with environmental sensors and installations for a power supply disappeared without trace at the end of August 2019. This equipment was installed by the GEOMAR Helmholtz Centre for Ocean Research Kiel and the Helmholtz-Zentrum Geesthacht Centre for Materials and Coastal Research on the seafloor in a restricted area at the exit of Eckernförde Bay
